

Weights &
Measures
Week:
March 1-7

Educating Today for Tomorrow

Weights and measures inspectors are rising to the challenge of new technologies in the marketplace. Technology can pass us by in the blink of an eye and the latest innovations in weighing and measurement are no exception. For regulatory officials who are responsible for oversight of software driven electronics that measure our fuel and weigh our food, education is always a top priority.

March 1-7, Weights and Measures Week, is a perfect time to say thank you to your local merchants and government for supporting the work of your weights and measures officials.
