

US Bioservices is Dispensing TETRABENAZINE, generic therapy for Huntington's chorea

Through a partnership with Kadmon Pharmaceuticals, LLC, and Camber Pharmaceuticals, Inc., US Bioservices is now dispensing TETRABENAZINE. This generic version of XENAZINE[®], which launched February 11, 2016, provides a lower-cost alternative to treat chorea (involuntary movements) associated with Huntington's disease (HD).

HD is a rare disease that currently affects about 30,000 people in the United States. Another 200,000 are at risk for developing HD due to genetic predisposition.
